PROFESSIONAL SUMMARY

Linux-focused IT professional with hands-on experience building and documenting infrastructure operations through NaviOps, a structured Linux and networking operations platform. Skilled in Linux administration, network troubleshooting, system monitoring, Bash scripting, log analysis, incident documentation, and operational support. Strong analytical, documentation, and process-improvement skills developed through years of compliance-driven healthcare operations. Seeking opportunities in NOC Operations, Linux Support, IT Infrastructure, and Systems Administration.

CORE COMPETENCIES

Linux Administration • Network Operations • Technical Support • NOC Operations • Network Monitoring • System Monitoring • Incident Management • Incident Response • Log Analysis • Troubleshooting • Root Cause Analysis • Bash Scripting • Technical Documentation • Change Management • Process Improvement • User Administration • Service Management • TCP/IP • DNS • DHCP • SSH • Firewall Fundamentals

TECHNICAL SKILLS

Linux: Rocky Linux, AlmaLinux, Ubuntu, Users & Groups, Permissions, ACLs, SSH, Systemd, Journald, Package Management, Process Management, Storage Fundamentals

Networking: TCP/IP, OSI Model, DNS, DHCP, NAT, Subnetting, Routing Fundamentals, Firewall Fundamentals, Network Diagnostics, Connectivity Troubleshooting

Automation & Tools: Bash Scripting, Shell Automation, Git, GitHub

Operations & Monitoring: Log Analysis, Incident Documentation, Root Cause Investigation, System Monitoring, Service Monitoring, Runbooks, Change Documentation, Technical Documentation

Productivity: Microsoft Office, Excel, Google Workspace, Reporting, Administrative Support, Data Management

PROJECTS

NaviOps — Linux Operations Platform

2026 - Present

- Building a structured Linux operations platform focused on NOC, Linux Support, and System Administration workflows.
- Developing Bash scripts for monitoring, audits, troubleshooting, reporting, and operational automation.
- Practicing Linux administration, networking diagnostics, log analysis, incident handling, and operational procedures.
- Maintaining runbooks, troubleshooting guides, technical documentation, and operational standards.
- Using Git and GitHub for version control, documentation, and project management.

ProfDiagnos.com — Clinical Operations Platform

- Contribute to platform operations, workflow management, documentation, testing, and process improvement.
- Support requirements analysis and operational coordination activities.
- Assist with workflow optimization and user-focused operational enhancements.
- Contribute to platform UX UI.

PROFESSIONAL EXPERIENCE

General Dentist | Family Healthcare Center, Egypt

2022 - Present

- Maintain accurate records and documentation in a high-responsibility operational environment.
- Perform systematic analysis, troubleshooting, and decision-making under pressure.
- Coordinate daily workflows, scheduling activities, and operational processes.
- Ensure compliance with established procedures, standards, and quality requirements.

Head of Infection Control Department | Family Healthcare Center, Egypt

8-Month Assignment

- Developed and maintained operational procedures, compliance documentation, and reporting processes.
- Conducted audits, investigations, process reviews, and corrective action follow-up.
- Trained staff on procedural standards and operational best practices.
- Identified workflow issues and implemented process improvements.

HOME LAB

Linux Administration • Networking & Troubleshooting • Bash Automation • SSH Configuration • System Monitoring • Log Analysis • Technical Documentation • GitHub Workflow Management

EDUCATION

Bachelor of Dental Medicine

LANGUAGES

Arabic: Native

English: Professional Working Proficiency (Written & Spoken)
